Introduction

Purpose

This update bulletin provides a brief description of the new customer-facing features and changes to existing features introduced in Roundtable TSMS 12.7. Other internal changes or bug fixes that have been made to improve organization and/or performance may not be described in this document.

Audience

This document is intended for current Roundtable TSMS users upgrading from 12.6 to 12.7 or Roundtable TSMS users who want to learn more about the new and changed features available in Roundtable TSMS 12.7.

Platform Availability and Compatibility

- The Roundtable TSMS 12.7 standard GUI client is available for OpenEdge 11.7 and higher on supported Windows platforms.
- The Roundtable TSMS 12.7 plug-in for OpenEdge is available for Progress Developer Studio for OpenEdge 11.7 and higher on supported Windows platforms.
- The Roundtable TSMS 12.7 server is available for all OpenEdge 11.7 and higher on supported server platforms.

Important

Roundtable TSMS software earlier than 12.7 is not compatible with Roundtable TSMS 12.7 repository databases. It is recommended that you maintain a separate repository if you must continue development that requires the use of older Roundtable TSMS releases.

For complete compatibility details of all Roundtable TSMS and Progress OpenEdge releases, please see the Roundtable TSMS Compatibility Matrix available at www.roundtable-software.com.

New and Enhanced Features

Roundtable TSMS 12.7 rolls-up all 12.6 service packs and includes the new features, enhancements, and bug fixes outlined below.

General Enhancements

The following new features were added for both the GUI and plug-in clients:

- Add logging to **Workspace Populate** process.
- Improve **Smart Compilation** performance by minimizing PROPATH changes.
- Increase Workspace ID format to accommodate for longer Workspace names.

GUI Client Changes

The following changes were made to support the general enhancements or are unique enhancements and bug fixes for the GUI client:

Features

- Add ability to create **Workspace Groups**.
- Add ability to pin Workspaces in the tabletop tree view.
- Add ability to save and restore user preferences.

Usability

- Add **Workspace Groups** maintenance window.
- Modify **Workspace Maintenance** window to allow specification of Workspace Group assignment.
- Modify tabletop tree view to display Workspaces according to their Workspace Group assignment.
- Add 'Pin to Top' and 'Remove Pin' context menus to tabletop tree view.
- Add 'Store' and 'Restore' buttons to **User Preferences** window.
- Show log when **Workspace Populate** is completed.

Bug Fixes

- Ensure that **Schema Viewer** index fields are displayed in ascending order by sequence.

Plug-in Client Changes

The following changes were made to support the general enhancements or are unique enhancements and bug fixes for the plug-in client:

Usability

- Display results of **Workspace Populate** in console view.

Bug Fixes

- Ensure that **Workspace Import** displays an error message if an error log has been returned after applying the import list.

Server Changes

The following changes were made to support the general enhancements or are unique enhancements and bug fixes for the server:

Bug Fixes

- Ensure that the auto-generated **Workspace Deployment** schema update directory is correct when no prior schema deployment exists.

Usability

- Improve task directory error messages to include the Workspace ID when needed.
